The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/620,488	Applicant(s) SAHITA, RAVI L.	
	Examiner DAVID Y. ENG	Art Unit 2455	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claims 1-30 are pending. Claims 16-26 are allowed. Claims 1-15 and 27-30 are rejected.

Specification

The summary of the invention submitted on 11/27/2007 is no different than the claims. The summary should point out the advantages of the invention or how it solves problems previously existent in the prior art and may include a statement of the object of the invention. A summary in accordance with 37 CFR 1.73 and MPEP § 608.01(d) is requested.

Response

In the communication filed on 7/25/2008, Applicants declined to submit a summary of the invention in accordance with 37 CFR 1.73 and MPEP § 608.01(d) for the reason that the summary is optional because the Rule uses the words “may” or “should”. A summary of the invention is for the benefit of Applicants and the public. The current summary of the invention is objected to because it is no different than the independent claim. The summary of the invention in the form of a claim does not serve its intended purpose. A claim is not a summary of the invention.

Section 112 Rejection

In view of the amendment filed on 7/25/2008, the Section 112, 2nd paragraph Rejection is withdrawn.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11, 13-15 and 27-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Gai (USP 6,892,237).

Details of the rejection have already been set forth in the last Office action. The details are incorporated herein by reference thereto.

Response

In the second paragraph of page 10 of communication, Applicants appear to contend that the Gai reference teaches outputting element 500 from a memory whereas Applicants teaches writing element into the memory. The argument is not persuasive. Note that a memory is for storing what is inputted in there and outputting what is stored in there. If there is no storing, there would not be any outputting. Gai therefore teaches writing element into the memory.

In the third full paragraph of page 10, Applicants rely on the disclosure in the specification for patentability. Note that limitations in the specification should not read into the specification.

In the second last paragraph of page 10, Applicants appear to contend that masking is not inherent in CAM. CAM stands for content address memory. Masking is inherent in CAM because it is required to mask bits for comparison.

Applicants fail to provide any patentability arguments. Simply pointing out what a claim requires with no attempt to point out how the claims patentably distinguish over the prior art does not amount to a separate argument for patentability. Applicants fail to explain why the claimed invention is patentable over Gai. As explained in the paragraphs above, Gai teaches all the features in the claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
